EQUIPMENT

Hellan Fluid Strainers: available in manual, motorized, single or dual basket configurations to provide removal of solids without interrupting of flow. Over 4,000 strainers are installed on Navy ships and all strainers meet Military Specs.

Staples & Pfeiffer Strainers Conventional duplex, simplex and Y-type strainers. Many models are Navy qualified and have ABS approvals for commercial marine applications.

Differential Pressure Gauges & Sight Flow Indicators

Every Hellan Strainer requires a DP gauge to indicate a cleaning cycle and a sight flow to view the debris leaving the strainer. Hellan offers Navy qualified gauges and sight flow indicators for every strainer they manufacture.

Hose reels are used aboard Navy and Coast Guard ships. Whether the application is for JP5 Fuel for aircraft refueling and defueling or AFFF for fire fighting, the reels, hoses and nozzles are Military specification approved.

Kahlenberg & Air Chime Ship Whistles, developed to withstand the punishing use of military service. The durability of these horns has been demonstrated over decades of service from Naval warships. All horns are Military Specification approved and/or IMO approved.

Megator self priming positive displacement sliding-shoe pumps provide exceptional suction performance and versatility. The pumps can run without harm during dry suction, self compensate for wear, have simple working parts and single cover access. All pumps are Military Specification approved.

Metpro Fybroc Pumps use advanced technology specializing in fiberglass-reinforced composite designed to handle corrosive and other difficult liquids. Materials of construction are available for a wide range of corrosive liquids.

Schroeder is a supplier of hydraulic filters, diagnostic test instrumentation, contamination testing products, filtration carts and mobile purification systems.

INSTRUMENTATION

Magtech offers Magnetostrictive TLLs, magnetic indirect reading sight glasses, ultrasonic transmitters and RF level switches and controls.

Madison offers level products for single, multi-level and continuous liquid level measurements. There bilge switches meet Mil-S-16032 and are ABS approved.

Federal Signal offers sirens, horns, beacons and strobes for alarm annunciation.

Thomas Products manufactures Mil-S-16032 flow switches.

Engineered to Uncompromising Standards. **Yours.** CMR offers a complete product line of microprocessor based panels and sensors for engine monitoring. Measurement Controllers can be used to display temperature, pressure, flow and other system parameters.

Kobold manufactures flow, pressure, temperature, and liquid level measurement systems. The product line is diverse and you will be able to specific products for your sensing needs.

ENVIRONMENTAL

MyCelx Technologies: IMO approved Bilge Water Treatment Packages

NEI Treatment Systems: Ballast Water Management Systems For Biological and Corrosion Control
